

American Association for the Surgery of Trauma

2016 Request for Access to Multi-Institutional Trials Data

The Multi-Institutional Trials Committee is accepting proposals for new multi-center studies and soliciting participation for recently approved studies.

Each study is headed by one Coordinating Center, which is primarily responsible for designing the protocol and data collection sheets. After appropriate input and revisions, the studies are posted on the AAST-MIT webpage and interested centers may participate.

Each study has a data collection sheet and study protocol on the AAST website.

Direct communication with the study PI prior to participating in the study is strongly encouraged. The AAST-MIT committee is looking forward to your enthusiastic support and participation in these and future studies.

If you would like access to enter data for a study, please complete the form(s) below.

KEYWORDS:

STUDY PI: This is the primary investigator of the study. The Study PI can see ALL data entered for a given study and can pull full reports across all sites/institutions. There is only one study PI.

SITE PI: This is the primary investigator for a given site/institution. The site PI can see ALL the data entered for a given site/institution and can pull reports for that site/institution.

NOTE: *Please make sure to confirm with your Site PI how the name of your hospital/institution should be listed on the form. The slightest difference can affect the data reports.*

If you have questions or would like more information on the AAST Multi-Institutional Trials Data Collection Tool, please contact Jermica Smith at jsmith@aast.org or visit our website at: www.aast.org

2016 Site PI Request for Access to Multi-Institutional Trials Data Collection Site

PLEASE TYPE OR PRINT CLEARLY ILLEGIBLE FORMS WILL NOT BE PROCESSED.

Site PI access will be granted with in 5 business days. General data tool access is granted with in 48 business hours of Site PI approval.

Select study below (If you are requesting access to more than one study please complete a form for each study):

X	OPEN STUDIES
<input type="checkbox"/>	Circulation First in Trauma - Do we have the orders of factors backwards?
<input type="checkbox"/>	Validating a Uniform System for Measuring Disease Severity in Necrotizing Fasciitis & Soft Tissue Infections
<input type="checkbox"/>	Aortic Trauma Foundation Blunt Thoracic Aortic Injury
<input type="checkbox"/>	Posterior Urethral Injury
<input type="checkbox"/>	Continuity vs Discontinuity for Bowel Injury in Damage Control Laparotomy
<input type="checkbox"/>	Risk stratification for chest trauma and its implications for rib fracture fixation: a multi-institutional AAST study
<input type="checkbox"/>	Assessment of Emergency General Surgery Care Based Upon Quality Indicators
<input type="checkbox"/>	AAST multi-center prospective, observational study on immune dysfunction in subjects who present with traumatic brain injury and receive beta adrenergic receptor blockers
<input type="checkbox"/>	Can the cervical spine be clinically cleared in awake and alert blunt trauma patients with "distracting injuries"?
<input type="checkbox"/>	A Multi-center Study of Renal and Bladder Trauma
<input type="checkbox"/>	AAST Multicenter Prospective Observational Study of Trauma Patients on Novel Oral Anticoagulants
<input type="checkbox"/>	Aortic Occlusion for Resuscitation in Trauma and Acute Care Surgery
<input type="checkbox"/>	The PROspective Observational Vascular Injury Trial (PROOVIT)
<input type="checkbox"/>	Detection and Management of Non-Compressible Hemorrhage by Vena Cava Ultrasonography

Site PI access is usually granted with in 5 business days.

General data tool access is granted with in 48 business hours of Site PI approval.

If you have any questions or need additional assistance, please contact:

Jermica Smith, AAST Program Manager at jsmith@aast.org or (312) 202-5553
