

### **(SICU) VENTILATOR LIBERATION**

☐ All patients who do not meet exclusionary criteria will undergo daily SBT including an ABG and RSBI per protocol without order as per the procedure described in the protocol. (default)

☐ Document vital signs, pulse oximetry, presence of a cuff leak and presence and nature of secretions as per protocol (default)

☐ Document SBT exclusions and result as per protocol. Restore patients who do not tolerate SBT to baseline ventilator settings and those who have successfully completed an SBT prior to an extubation order (default)

☐ Please obtain "off protocol" SBT and document results

☐ Extubate to \_\_\_\_ FiO<sub>2</sub> by \_\_\_\_ (face mask, face tent, nasal cannula O<sub>2</sub>, room air, BiPaP (\_\_\_\_/\_\_\_\_))

☐ Please obtain post-extubation ABG within 30 minutes (default)
