Study Site Information
Location
- Urban
- Suburban
- Rural
- Military
- Other

Geographic region
- Mid-Atlantic
- Mid-West
- North-East
- North-West
- South-East
- South-West

Trauma Center
- Yes
- No

Trauma ACS or state level verification equivalent
- Level I
- Level II
- Level III
- Level IV

Designated level
- 1
- 2
- 3
- Other

Approximate number of trauma admissions/year

Baseline variables:
Age at injury (years)
Sex
- Male
- Female
- Unknown

Race
- White
- Black
- Asian
- Other
- Unknown
Ethnicity
- Non-Hispanic
- Hispanic
- Unknown

Insurance
- Medicare
- Medicaid
- Commercial
- Military
- None
- Unknown
- Other

Comorbidities and Medications:
- Psychiatric
  - Depression
  - Schizophrenia
  - Other (please specify)
- Substance abuse (specify)
  - Prescription drug
  - Heroin
  - Cocaine
  - Alcohol
  - Other (please specify)
- Alcohol - more than 7 drinks/week?
  - Yes
  - No
  - Unknown

Home Medications
- Unknown
- Total number of medications excluding OTC/vitamins
- Narcotics
- Antiplatelet agents
- Anticoagulants

Pre-injury location of residence
- Home
- Assisted living
- Long term care/nursing home
- Rehabilitation facility
- Shelter
- None
- Other
- Unknown
Marital status
   Married
   Never married
   Divorced/separated
   Widowed
   Unknown

Trauma specific frailty index:
   Cancer history
      Yes
      No
   Coronary artery disease
      Myocardial infarction
      Coronary artery bypass grafting
      Percutaneous coronary intervention
      Cardiac medication
      No medication
   Dementia
      Severe
      Moderate
      Mild
      None

Daily activities
   Help with grooming
      Yes
      No
   Help with managing money
      Yes
      No
   Help toileting
      Yes
      No
   Help walking
      Wheelchair
      Walker
      Cane
      None

Health attitude
   Feels less useful
      Most time
      Sometimes
      Never
   Feel sad
      Most time
      Sometimes
      Never
Feel effort to do everything
   Most time
   Sometimes
   Never

Falls
   Most time
   Sometimes
   Never

Function, sexually active
   Yes
   No

Dead

Functional evaluation at discharge per standard of care

Outcome
- Good – close to baseline
- Poor – not close to baseline

Performance status
- Fully active at pre-injury level performance
- Restricted in physically strenuous activity but ambulatory and able to carry out work of a light or sedentary nature
- Ambulatory and capable of all selfcare but unable to carry out any work activities; up and about more than 50% of waking hours
- Capable of only limited selfcare; confined to bed or chair more than 50% of waking hours
- Completely disabled; cannot carry on any selfcare; totally confined to bed or chair
- Dead
