

American Association for the Surgery of Trauma

## **2015 Request for Access to Multi-Institutional Trials Data Collection Site**

The Multi-Institutional Trials Committee is accepting proposals for new multi-center studies and soliciting participation for recently approved studies. Each study is headed by one Coordinating Center, which is primarily responsible for designing the protocol and data collection sheets. After appropriate input and revisions, the studies are posted on the AAST-MIT webpage and interested centers may participate.

Each study has a data collection sheet and study protocol on the AAST website. Direct communication with the study PI prior to participating in the study is strongly encouraged. The AAST-MIT committee is looking forward to your enthusiastic support and participation in these and future studies.

*If you would like access to enter data for a study, please complete the other side of this form.*

### **KEYWORDS:**

**STUDY PI:** This is the primary investigator of the study. The Study PI can see ALL data entered for a given study and can pull full reports across all sites/institutions. There is only one study PI.

**SITE PI:** This is the primary investigator for a given site/institution. The site PI can see ALL the data entered for a given site/institution and can pull reports for that site/institution.

If you have questions or would like more information on the AAST Multi-Institutional Trials Data Collection Tool, please contact Jermica Smith at [jsmith@aast.org](mailto:jsmith@aast.org) or visit our website at: [www.aast.org](http://www.aast.org)
