Acute Care Surgery Fellowship Rotation Evaluation Tool

Signature of Fellow & Date

| Fello | w: |
|---------|---|
| Date: | |
| This e | valuation serves to assess the fellows' performance from to on thee. |
| Select | One |
| This ev | valuation represents brief (1-2 days) / moderate (1-2 weeks) / extensive (> 2 weeks) exposure to low. |
| Com | petencies Evaluation |
| | ading system used for this portion of the evaluation is a 5-point Likert scale to be graded as follows 1 = unacceptable performance requiring immediate remediation. <1% of all fellows 2 = well below the expected level for this level of training. 5-10% % of all fellows 3 = good performance at the level expected by the fellowship. 80-90% of fellows should reach this level 4 = excellent, definitively above the performance of most fellows. 10-15% of all fellows 5 = truly outstanding, well beyond the performance of all peers. <1 % of all fellows the provide specific comments to support the grades of 1-2 or 4-5. |
| | upon my interactions with the fellow during this rotation, I would assess their ability to practice as an Care Surgeon as |
| 0 | Requires <i>Direct Supervision</i> for all major cases Indirect Supervision is adequate for cases Unsupervised practice is appropriate for the majority of cases Demonstrates Attending level competency, able to teach others |

Core Surgical Skills

The grading system used for this section is a 4-point Likert scale representing core competencies as follows

- 1 = Direct Supervision is required (attending must be scrubbed)
- 2 = Indirect Supervision is required (attending must be in the room, not scrubbed)
- 3 = Unsupervised Practice (attending is readily available)
- 4 = Capable of Supervising Others (fully independent)
